

COVID-19 GUIDELINES FOR CAMPGROUND OPERATORS & STAFF

Clean & Sanitize Surfaces Frequently

- Surfaces to be cleaned frequently include (but are not limited to): door knobs, common areas, and bathhouses.
- Use cashless payment options whenever possible.
- Use substances containing quaternary ammonia (quat) or sodium hypochlorite (bleach). Visit EPA.gov for more COVID-19-registered disinfectants.

Wash Hands Often

- Hands should be washed frequently for at least 20 seconds with soap and water.
- Wash hands immediately after: coughing, sneezing, blowing your nose, eating or drinking, touching your face, using the restroom, cleaning or handling dirty dishes, or touching contaminated surfaces.

Practice Social Distancing

- Maintain at least 6 feet separation between all campers and staff; all campers should stay at their campsites except for essential needs.
- No large groups should form on beaches, playgrounds or at pools.
- Campers should not congregate at another camper's site.
No parties of any kind.
- Limit visitors.

Keep Sick Campers at their Campsites

- Campers who begin to feel ill with symptoms of COVID-19 (fever, cough, difficulty breathing) or any other illness **MUST** stay at their campsites.
- Ill campers should travel only for medical care and call ahead to alert the medical provider they are coming.
